Cure for Mud Fever

Our Equidae Screen, as can be seen from the below photographs, has proven to be an exceptionally good all-in-one treatment for horses that have contacted “mud fever.”

It is effective against both fungal and bacteria type infections, will penetrate the scabs, including breaking them down, and providing sun protection for the raw skin as it heals, thereby providing an all-in-one treatment for affected horses.

It can be applied to either wet or dry infections.
