

One24 Wound Healer

Great for Reducing the Pain,

Discomfort and Size of Scars of all types

Our Wound Healer as can be seen from the below photographs has proven to be exceptionally good in healing even the largest of scars including surgical scars from broken limbs and Caesareans. The additional benefits to the healing of the wound include:

- Pain relief
- Pliability of the scar and surrounding skin so no tearing sensation
- No Keloids – lumpy or ridged skin
- Reduced scarring

Testimonial

Hi

I recently required surgery to my right leg after falling from my horse.

When I was released from hospital, I asked John if I could try his One24 Wound Healer as I had heard it was very good for helping to heal scars. He gave me a pot and it worked much better than I was expecting.

I found the wound healer gel to be very easy to use. A little goes a long way, there is no sting when it goes into the wound, and it is not greasy. It also made my skin really soft and pliable so there was no tearing sensation around my scar as I tried to move around.

My incision has healed really well from using the wound healer on a daily basis. The scar is now well healed and there is no pulling or any keloids.

After my experience I fully recommend the use of One24's wound healer in helping to heal both wounds and scarring resulting from those wounds.

Yours sincerely

Janna Britton
